

TABLE OF CONTENTS

CHAPTER 1: Introduction

1.1	Background	1-2
1.2	Project Goal and Objectives	1-2
	1.2.1 Project Goal	1-2
	1.2.2 Project Objectives	1-2
1.3	Project Approach and Report Overview	1-3
1.4	Applications of the Approach	1-4
1.5	USFWS Coordination	1-4

CHAPTER 2: Conclusions and Recommendations

2.1	Introduction	2-1
2.2	State and Ecoregion Scale	2-1
	2.2.1 The Estuary	2-1
	2.2.2 The Lowlands	2-3
	2.2.3 The Uplands	2-4
	2.2.4 The Basin	2-5
2.3	Tillamook Bay Basin Scale	2-5
2.4	Public Policy	2-7
2.5	Flood Response and Waterway Permitting	2-7
2.6	Conclusions Concerning Integrated River Management Strategies	2-9

LIST OF FIGURES

Figure 2-1	Tillamook Bay Lowland Floodplain	2-2
------------	----------------------------------	-----

CHAPTER 3: River Systems

3.1	The River System	3-2
3.2	Flooding and Floodplain Functions	3-2
3.3	Flooding and Fish and Wildlife Habitats	3-5
3.4	Human Alterations of the River System	3-7
3.5	Trends in Floodplain Management	3-12

LIST OF FIGURES

Figure 3-1	Schematic of the Flood-Pulse Concept	3-3
Figure 3-2	River Floodplain Landform Schematic	3-5

Figure 3-3	Riparian Functional Relationship to Salmon	3-7
Figure 3-4	Schematic of Progressive Floodplain Development	3-9
Figure 3-5	Floodplain Water Table Changes with Channelization	3-10
Figure 3-6	Flood Damage Trends for the United States.	3-11
Figure 3-7	Flood Control Cost Trends in the United States	3-11
Figure 3-8	Policy Evolution from Flood Control to Flood Management.	3-13
Figure 3-9	Pathways to Sustainable Development for the Water Environment	3-13

CHAPTER 4: Regional Overview of Flood Risk & Salmon Distribution

4. Regional Overview of Flood Risk and Salmon Distribution	4-1
4.1 Oregon Floodplains	4-2
4.2 Regulatory Floodplains	4-2
4.3 Geomorphic Floodplains	4-2
4.4 Flood Damages	4-2
4.5 1996 Floods	4-3
4.6 Salmon Distribution	4-5
4.7 Ecoregions	4-9

LIST OF FIGURES

Figure 4-1.	Oregon Regulatory Floodplains	4-3

Figure 4-12.	Combined Distribution of all Five Species	4-10
Figure 4-13.	Ecoregions of Oregon	4-10
Figure 4-14.	Oregon Coast Ecoregion with NFIP Claims and Salmon Distribution	4-12

CHAPTER 5: History and Effects of Human Interventions in the Tillamook Basin

5.	History and Effects of Human Interventions in the Tillamook Basin	5-1
5.1	Historic Landscape Conditions	5-2
5.1.1	Landscape Habitats	5-2

5.2	5.1.2 Landscape Processes	5-3
	Historic Salmon Abundance	5-4
5.3	Human Alterations to the Landscape	5-8
	5.3.1 Changes in Upland Forests	5-8
	5.3.2 Changes in Lowlands and Estuaries	5-11

LIST OF FIGURES

Figure 5-1.	Estuary Size and Drainage Area for Oregon Coastal Basins	5-5

CHAPTER 8

8. An Integrated River Management Strategy (IRMS) for the Tillamook Bay Watershed

8.1	Introduction	8-1
8.2	A Vision for the Integrated Management of the Tillamook Bay Watershed	8-1
8.3	Fundamental Principles of the IRMS	8-6
8.3.1	Flood Risk Reduction Principles	8-6
8.3.2	Salmon Recovery and Conservation Biology Principles	8-7
8.3.3	Landscape Ecology Principles	8-8
8.3.4	Sustainability Principles	8-8
8.3.5	Cumulative Effects Principles	8-9
8.4	Summary of Potential IRMS Strategies and Actions	8-10
8.4.1	Overview	8-10
8.4.2	Fundamental Upland Management Strategies	8-11
8.4.3	Combined Floodplain and Active Floodplain Zones	8-11
8.4.4	Active Floodplain Zone	8-13
8.4.5	Floodplain Zone	8-14
8.4.6	Tidal Zone	8-15
8.5	IRMS Implementation Considerations	8-15
8.6	Monitoring Program and Adaptive Management Considerations	8-16

Boxes

8-2	Principals of Flood Risk Reduction	8-18
8-3	Salmon Recovery and Conservation Biology Principals	8-18
8-4	Landscape Ecology Principals	8-19

8-5	Sustainability Principals	8-19
8-6	Cumulative Effects Principals	8-20
8-7	Key IRMS Implementation Considerations	8-20
